Concerning the departments of Indre (36), Dordogne (24), **Hautes-Pyrénées (65)** and Rhône (69), the DGAL is in the process of finalising the study of surveillance data in order to lift the restricted zones in the near future, which will allow these departments to recover its free status in the absence of a new outbreak.

- **Gers (32): 2 additional outbreaks**

Municipality	NRL PCR clade H5 HP	Species	Estimated number
EAUZE	24/01/2023	Gallus gallus	17 600
AYSIEU	22/01/2023	Duck	3 555

- **Landes (40): 3 new outbreaks**

Municipality	NRL PCR clade H5 HP	Species	Estimated number
CAGNOTTE	25/01/2023	Duck	1 700
SAINT LON LES MINES	25/01/2023	Duck	820
CAGNOTTE	21/01/2023	Duck	5 400

Sanitary measures, zoning

As for all outbreaks, as soon as the suspicion was raised, sanitary management measures were triggered within the EU regulatory implemented zoning (3 km Protection Zone "ZP" and 10 km Surveillance Zone "ZS" around the farm): culling of poultry on affected farms (either as a preventive measure or at the latest the day after NRL confirmation), reinforcement of biosecurity measures, census of farms and ban on poultry movements.

Raising the risk level

The level of risk with regard to HPAI has been raised from "moderate" to "high" (*ministerial decree of 8 November 2022*), which makes the compulsory confinement of poultry by their keepers since 11 November 2022 throughout metropolitan France.
