Sanitary measures, zoning

As for all outbreaks, as soon as the suspicion was raised, sanitary management measures were triggered within the EU regulatory implemented zoning (3 km Protection Zone "ZP" and 10 km Surveillance Zone "ZS" around the farm): culling of poultry on affected farms (either as a preventive measure or at the latest the day after NRL confirmation), reinforcement of biosecurity measures, census of farms and ban on poultry movements.

Raising the risk level

The level of risk with regard to HPAI has been raised from "moderate" to "high" (*ministerial decree of 8 November 2022*), which makes the compulsory confinement of poultry by their keepers since 11 November 2022 throughout metropolitan France.
