

France has recovered HPAI-free status since February 4, 2025

No outbreak in poultry has been recorded since January 4, 2025. All restrictive measures were lifted for the entire national territory of France on February 4, 2025. France is free of HPAI according to the European union regulation and to the provisions of the World Organization for Animal Health (WOAH) since February 4, 2025 (Article 10.4.6 of the Terrestrial animal health Code).

Thus, in accordance with chapter 1.1 of the Terrestrial Animals Health Code (Code), WOAH closed on its official WAHIS website the [event no. 6127](#) with a closing date of February 4, 2025 .
